

Comparing T. Rowe Price composites with their benchmarks

Q1 2024

This extensive study seeks to measure the value added by T. Rowe Price's investing approach by comparing the performance of the firm's actively managed composites with their primary benchmarks across standardized time period windows, rolled monthly, over the past 20 years.

The study compares the individual performance of 117 actively managed T. Rowe Price composites with their relevant benchmarks. The broad range of composites included in the study is intended to illustrate the performance of T. Rowe Price's investing approach at asset class and total firm levels.

Composite returns were calculated net of fees, based on the highest breakpoint fee applicable for T. Rowe Price institutional clients.

Study universe

This broad study examines the performance of 117 actively managed T. Rowe Price composites (70 equity and 47 fixed income) over the 20 years ended December 31, 2023, or since inception for composites without a full 20-year performance history. The study included our actively managed, institutional equity and fixed income composites. It excluded any dormant or previously terminated composites.

The study excluded money market and passive composites those that sought to track the performance of a particular market or asset class benchmark. Also, in instances where a specific investment strategy included multiple composites, we used only the composite with the highest assets under management to avoid double counting. All told, the composites in the study represented almost 82% of composite assets managed by T. Rowe Price as of December 31, 2023.

For consistency, and to capture as much performance history as possible, composites with even a single period of comparability between the composite and its benchmark were included in the analysis.

Past performance cannot guarantee future results.

T. Rowe Price's investing approach

At T. Rowe Price, we don't stop at surface-level analysis, drawing on the size and depth of our global research organization to pursue opportunities across asset classes, sectors, geographies, and styles.

We focus on pursuing greater returns over long time horizons and take a proven and repeatable approach to carefully manage risk and pursue investment opportunities.

The study examines whether T. Rowe Price's investing approach has added value by comparing the performance of the firm's actively managed composites with their primary benchmarks.

The dataset comprises 1-, 3-, 5-, and 10-year rolling returns for the T. Rowe Price composites and their benchmarks, rolled monthly. Because a number of composites had performance histories that were considerably shorter than the full 20-year period covered by the study, the results are inherently time weighted because the number of eligible rolling periods for each composite in a given time window equals a percentage of the total number of rolling periods for all the composites in its asset class—or, for equity composites, in its equity subclass.

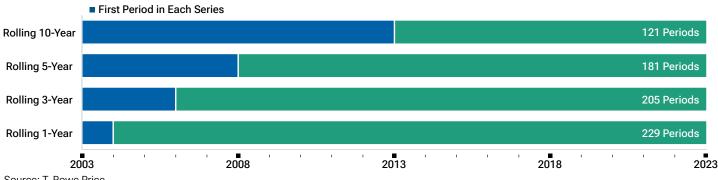

In other words, a composite with a shorter history had a lower weight in the average than a composite with a full performance history.

Returns for the multiyear rolling periods were annualized. Where permitted by the underlying performance data, these rolling analysis periods began on January 1, 2004, and ended on December 31, 2023.

Figure 1 shows how many different rolling periods of returns were produced in each rolling time window (one, three, five, and 10 years), when a T. Rowe Price composite and its benchmark both exhibited a full performance history.

Rolling periods in performance study*

(Fig. 1) Example of a composite with a full 20-year performance history

Source: T. Rowe Price.

* For illustrative purposes. The graph depicts the number of rolling periods and their start dates for an actively managed T. Rowe Price composite with a full performance history. This applied to 59 of the 117 composites included in the study. Fewer performance periods were available for other T. Rowe Price composites, depending on their inception dates.

If a T. Rowe Price composite included in the study incepted after January 1, 2004, its performance was tracked across standardized rolling periods from the first full month for which it had a track record.

The one-year time window contains the most rolling periods for analysis, potentially as many as 229 one-year periods, rolled monthly. These data points are also proportionally indicative of how many rolling periods were analyzed in the multiyear time windows for each composite. In total, 12,122 rolling periods were analyzed for equity composites and 6,833 for fixed income composites.

Figure 2 breaks out the number of T. Rowe Price composites in each asset class for the 1-, 3-, 5-, or 10-year rolling time windows. Depending on the T. Rowe Price composite's inception date, some composites may have lacked the track record to be included in the analysis for some rolling time windows.

Performance metrics

All study results were based on total returns, which reflect the reinvestment of dividends and are net of all non-reclaimable

withholding taxes on dividends, interest income, and capital gains. Performance was calculated net of fees, based on the highest breakpoint fee for T. Rowe Price institutional clients. In other words, the returns used in the study were based on each composite's performance, net of fees.

Excess returns

Excess return is the difference between a T. Rowe Price composite's return and the return on the relevant benchmark over a given analysis period.

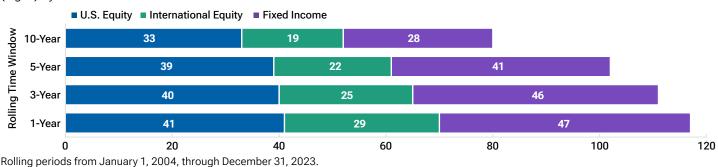

Figure 3 highlights the average excess returns for T. Rowe Price composites, aggregated by asset class (equity and fixed income) and by equity subclass (U.S. equity and international equity).

Active success rate

The active success rate is the percentage of rolling periods that a T. Rowe Price composite generated excess returns that were greater than zero, indicating that it outperformed its benchmark.

Number of T. Rowe Price composites analyzed in each rolling time window

(Fig. 2) By asset class

Source: T. Rowe Price. Composite categories based on T. Rowe Price's internal classification. See Fig. 5 for details.

A composite that outperformed its benchmark in more than 50% of all rolling periods in a given time window was deemed to have achieved a positive active success rate for that window.

Figure 4 shows average returns-based active success rates for T. Rowe Price composites at the asset class and equity

sub-asset class level. The composites included in the study are shown in Figure 5 (U.S. and international equity) and Figure 6 (fixed income). Those figures also show the number of rolling one-year periods in which each T. Rowe Price composite had a performance record.

Average annualized excess returns (net of fees) for T. Rowe Price composites

(Fig. 3) Time-weighted averages in percentage points*

Asset and Sub-asset Class	1-Year	3-Year	5-Year	10-Year
Equity	1.24	1.21	1.34	1.39
U.S. Equity	1.14	1.28	1.48	1.45
International Equity	1.42	1.06	1.07	1.27
Fixed Income	0.27	0.17	0.16	0.33
All Composites	0.89	0.89	0.99	1.06

Past performance cannot guarantee future results.

Rolling periods from January 1, 2004, through December 31, 2023. Results are net of fees.

Source: T. Rowe Price. Composites categories based on T. Rowe Price's internal classifications. See Fig. 5 for details.

* Averages are inherently time weighted to reflect the number of eligible rolling periods for each composite in a specific rolling time window (1, 3, 5, or 10 years) as a percentage of the aggregate number of rolling periods for all composites in its asset class and, for an equity composite, in its sub-asset class.

Active success rates for T. Rowe Price composites

(Fig. 4) Rolling periods January 1, 2004, through December 31, 2023

		Rolling Periods						
Asset and Sub-asset Class	1-Year	3-Year	5-Year	10-Year

Periods with positive active success rates (higher than 50%) or positive average excess returns.

Past performance cannot guarantee future results. See standardized performance tables for standardized performance information. * Excess return is the difference between a T. Rowe Price composite's return and the primary benchmark return over a given analysis period.

⁺ Active success rate = percentage of rolling periods in which a composite outperformed its primary benchmark, net of fees.

[†] For composites without a 10-year performance history.

[‡] The Lipper Indexes ("Indexes") shown for the Communications & Technology Equity, Financial Services Equity, and Health Sciences Equity composites reflect the performance of U.S. mutual funds and are shown for informational purposes only. The composite is not a fund and, therefore, is not included in the Index performance calculations. There are differences between mutual funds and composites/separate accounts that may cause performance results to differ. Net of fees performance reflects the deduction of the highest applicable management fee, as shown in the chart, that would be charged to an institutional client without the benefit of breakpoints.

For any equity benchmarks shown, returns are shown with gross dividends reinvested, unless otherwise noted.

For illustrative, informational purposes only. Not all strategies/structures shown are available in all jurisdictions from T. Rowe Price.

Important Information

This material is being furnished for general informational and/or marketing purposes only. The material does not constitute or undertake to give advice of any nature, including fiduciary investment advice, nor is it intended to serve as the primary basis for an investment decision. Prospective investors are recommended to seek independent legal, financial and tax advice before making any investment decision. T. Rowe Price group of companies including T. Rowe Price Associates, Inc. and/or its affiliates receive revenue from T. Rowe Price investment products and services. Past performance is not a reliable indicator of future performance. The value of an investment and any income from it can go down as well as up. Investors may get back less than the amount invested.

The material does not constitute a distribution, an offer, an invitation, a personal or general recommendation or solicitation to sell or buy any securities in any jurisdiction or to conduct any particular investment activity. The material has not been reviewed by any regulatory authority in any jurisdiction.

Information and opinions presented have been obtained or derived from sources believed to be reliable and current; however, we cannot guarantee the sources' accuracy or completeness. There is no guarantee that any forecasts made will come to pass. The views contained herein are as of the date written and are subject to change without notice; these views may differ from those of other T. Rowe Price group companies and/or associates. Under no circumstances should the material, in whole or in part, be copied or redistributed without consent from T. Rowe Price.

The material is not intended for use by persons in jurisdictions which prohibit or restrict the distribution of the material and in certain countries the material is provided upon specific request. It is not intended for distribution to retail investors in any jurisdiction.

Risks: All investments are subject to risk, including the possible loss of principal. Equity security prices can be volatile which may result in gains or losses. Fixed income securities are subject to credit risk, liquidity risk, call risk, and interest rate risk. As interest rates rise, bond prices generally fall. International investments can involve additional risk due to the adverse effects of currency exchange rates, differences in market structure and liquidity, as well as specific country, regional, and economic developments. These risks can be greater in emerging markets.

This material was prepared for use in the United States for U.S.-based plan sponsors, consultants, and advisors, and the material reflects the current retirement environment in the U.S. It is also available to Canadian-based plan sponsors, consultants and advisors for reference. There are many differences between the two nations' retirement plan offerings and structures. Therefore, this material is offered to accredited investors in Canada for educational purposes only and does not constitute a solicitation or offer of any product or service.

Canada—Issued in Canada by T. Rowe Price (Canada), Inc. T. Rowe Price (Canada), Inc.'s investment management services are only available to Accredited Investors as defined under National Instrument 45-106. T. Rowe Price (Canada), Inc. enters into written delegation agreements with affiliates to provide investment management services.

USA—Issued in the USA by T. Rowe Price Investment Management, Inc., T. Rowe Price Associates, Inc., 100 East Pratt Street, Baltimore, MD, 21202, which are regulated by the U.S. Securities and Exchange Commission. For Institutional Investors only.
